

HiFlux Filtration A/S

Professional CONTROLLERS Auto-line

On/ off controllers with timer function

Electric - Rotating version

Pneumatic - Linear version

Auto-line - Controllers with built-in timer function

2 controller versions for the Auto-line self-cleaning filters are compact, simple on/off controllers with built-in timer function.

There is a built in timer for drain, which gives the possibility to set the drain interval to fit the process in question. In addition, it is possible to override with a manual drainage if the production requires an extra drainage.

These controllers provide high reliability and secure operation. They are designed with a focus on safety during filter operation with regards to the selected components for the controllers. The design is simple to ensure easy maintenance.

The sturdy construction of the cabinet is well suited for placement in industrial environments.

The cabinet is supplied with lockable covers.

- Customized for Auto-line filters
- Simple on/ off controller
- Safe and simple operation
