World leading company producing customized hygienic filter solutions. Increased food security, productivity and better profitability.

HiFlux Filtration A/S

About the AUTO-LINE® Automatic filter

Used at several slaughterhouses across Europe.

Before installation:

Cleaning manual filters regularly, high maintenance costs, downtime in production.

After installation:

Automatic process, increased productivity, maximum food security, no production stops.

Facts for the Auto-line® Automatic filter

Complies to the regulations EC1935/2004 and EU 10/2011, as well as the FDA standards. CIP friendly design with respect to the hygienic design recommendations by the European Hygienic Equipment Design Group (EHEDG).

HiFlux Auto-line® Filter has been designed as a compact, self-cleaning filter. The sturdy construction of the filter makes it well suited for applications in which operational reliability and dependability are essential.

Accurate filtration down to 35 micrometers [μm].

FEATURES

- **Removes unwanted particles**
High operational reliability.
- **Ensures the quality**
Increased product quality.
- **Continuous flow process**
Self-cleaning application.
- **Eliminates downtime**
Optimizing earnings.

Did you know?

At a slaughterhouse in Denmark the Auto-line filter removes ear marks, projectiles, hair, and small pieces of rope, before the blood is heat treated for selling to animal food production. The flow rate is 30 tons a day.
