

# PROFESSIONAL FILTRATION HONEY & SYRUP

HiFlux Auto-line® filters are specially designed for automatic filtration of honey and syrup.

*World leading company producing customized hygienic filter solutions. Increased food security, productivity and better profitability.*

**HiFlux Filtration A/S**

### About the Auto-line® Automatic filter:

Installed at several of Europe's largest manufacturers of honey and syrup.

#### Before installation:

Cleaning manual filters regularly, high maintenance costs, downtime in production.

#### After installation:

Automatic process, increased productivity, minimal maintenance, no production stops.

### Facts for the Auto-line® Automatic filter

Complies to the regulations EC1935/2004 and EU 10/2011, as well as the FDA standards. CIP friendly design with respect to the hygienic design recommendations by the European Hygienic Equipment Design Group (EHEDG).

HiFlux Auto-line® Filter has been designed as a compact, self-cleaning filter. The sturdy construction of the filter makes it well suited for applications in which operational reliability and dependability are essential.

Accurate filtration down to 50 micrometers [ $\mu\text{m}$ ].

### FEATURES

- **Removes unwanted particles**  
High operational reliability.
- **Ensures the quality**  
Increased product quality.
- **Continuous flow process**  
Self-cleaning application.
- **Eliminates downtime**  
Optimizing earnings.
- **Removal of soft particles**
- **High viscosity**

### Did you know?

When honey is filtered, it is aesthetically pleasing to the consumer and ensures the honey remains fluid for a longer period. Filtering removes bee parts, wax and solids, including the majority of pollen that can hasten crystallization. Crystallization is the number one consumer complaint in regards to honey.
