

PROFESSIONAL FILTRATION INK

HiFlux Auto-line® filters are specially designed for automatic filtration of ink in industrial productions.

World leading company producing customized industrial filter solutions. Increased security, production and better profitability.

HiFlux Filtration A/S

About the Auto-line® Automatic filter

Installed at several ink manufacturers across Europe.

Before installation:

Cleaning manual filters regularly, high maintenance costs, downtime in production.

After installation:

Automatic process, increased productivity, minimal maintenance, no production stops.

Facts for the Auto-line® Automatic filter

Complies to the requirement of hygienic cleanable design.

HiFlux Auto-line® Filter has been designed as a compact, self-cleaning filter. The sturdy construction of the filter makes it well suited for applications in which operational reliability and dependability are essential.

Accurate filtration down to 50 micrometers [μm].

FEATURES

- **Removes unwanted particles**
High operational reliability.
- **Ensures the quality**
Increased product quality.
- **Continuous flow process**
Self-cleaning application.
- **Eliminates downtime**
Optimizing earnings.
- **Special filter wagons**
Easy to move the filter around.
- **Lifting device**
Easy maintenance.
- **Removal of soft particles**
- **Nozzles for cleaning**

Did you know?

That ink can be contaminated several places in the manufacturing process! In order to achieve superior image quality filtration is required. By filtering effectively, oversized pigments and agglomerates can be removed, resulting in better print quality. Print quality is affected by these contaminants, leading to downtime and print defects. Filtration of digital inks is essential for obtaining high-quality images and optimizing printer uptime.
