Accurate filtration down to 35 micrometers [μm].

FEATURES

- **Removes unwanted particles**
Cleaner end product.
- **Ensures the quality**
Increased safety.
- **Continuous flow process**
No production stops.
- **Eliminates downtime**
Optimizing earnings.

Did you know?

That, one of our customers is using the Auto-line filter to filtrate the chocolate, that has been used at the production line, to remove parts of biscuit in the chocolate and then reuse the chocolate in the production. After removing the old bagfilters, they have also increased production and completely removed costs for filter bags. Today the production line runs more efficient and there is no need for continuously monitoring and daily maintenance.
