

# PROFESSIONAL FILTRATION FISH PRODUCTION

HiFlux Auto-line® filters are specially designed for automatic filtration of water from fish production.

*World leading company producing customized industrial filter solutions. Increased security, production and better profitability.*

**HiFlux Filtration A/S**

### About the Auto-line® Automatic filter

The Auto-line filter is being used at several fish farms in Europe and is filtering the fish lice away before the water is being returned back into the sea.

#### Before installation:

Cleaning manual filters regularly, high maintenance costs, downtime in production.

#### After installation:

Automatic process, increased productivity, minimal maintenance, no production stops.

### Facts for the Auto-line® Automatic filter

HiFlux Auto-line® Filter has been designed as a compact, self-cleaning filter. The sturdy construction of the filter makes it well suited for applications in which operational reliability and dependability are essential.

Accurate filtration down to 30 micrometers [ $\mu\text{m}$ ].

### FEATURES

- **Removes unwanted particles**  
High operational reliability.
- **Ensures the quality**  
Increased product quality.
- **Continuous flow process**  
Self-cleaning application.
- **Minimize maintenance**  
Increased productivity.

### Did you know?

That, fish farming is one of the most effective food productions in the world. When producing salmon, the water consumption is only 1/3 compared to production of pigs.

Compared with other meat production based on concentrated feed, salmon farming provides a very effective utilization of the energy and protein in the feed

### Facts and regulations:

**PED ATEX**

**CE ISO 9001**
