

# PROFFESIONAL FILTRATION PAINT

HiFlux Auto-line® filters are specially designed for automatic filtration of paint in industrial productions.

*The demands from the coating industry is ever increasing and the focus on increased efficiency, reliable filtration, ensuring product quality and productivity is a top priority.*

HiFlux Filtration A/S

# Filtration solutions for the coating and chemical industry

## Easy to service and clean

The filter has been designed with special attention to ease of service and cleaning. Few moving parts ensure trouble-free operation and make the filter very reliable and easy to service.

The filter is designed with smooth surfaces, ensuring easy cleaning between batches and reducing time-consuming manual work. For even better performance during cleaning the filter may be supplied with surfaces polished to Ra 0,8 µm.

## Quality and safety, increased productivity and higher bottom line earnings

- Less hazardous waste
- No cost of consumables like filter bags
- Far less product loss compared to filter bags
- No re-filtration of batches due to ruptured filter bags
- No product recalls from the market
- Uniform product quality due to constant filtration grade

## Coatings and chemicals

- Water based
- Solvent based
- Oil based
- Lacquers
- Varnishes
- Fillers
- Resin & Binders
- Additives
