

PROFESSIONAL FILTRATION ICE CREAM

HiFlux Auto-line® filters are specially designed for automatic filtration of ice cream

World leading company producing customized hygienic filter solutions. Increased food security, productivity and better profitability.

HiFlux Filtration A/S

About the Auto-line® Automatic filter:

Installed at many producers of ice cream, stick ice cream and wafer croissants. Our customers wanted a high degree of food safety, reduction of downtime and costs.

Before installation:

Cleaning manual filters regularly, high maintenance costs, downtime in production.

After installation:

Automatic process, increased productivity, minimal maintenance, no production stops.

Facts for the Auto-line® Automatic filter

Complies to the regulations EC1935/2004 and EU 10/2011, as well as the FDA standards. CIP friendly design with respect to the hygienic design recommendations by the European Hygienic Equipment Design Group (EHEDG).

HiFlux Auto-line® Filter has been designed as a compact, self-cleaning filter. The sturdy construction of the filter makes it well suited for applications in which operational reliability and dependability are essential.

Accurate filtration down to 30 micrometers [μm].

FEATURES

- Removes unwanted particles
Cleaner end product.
- Ensures the quality
Increased safety.
- Continuous flow process
No production stops.
- Eliminates downtime
Optimizing earnings.

Did you know?

When producing ice cream it is carried out in closed systems to ensure a particularly high level of hygiene protection. The raw materials are carefully balanced and mixed to obtain the same taste and consistency. A consistent, homogenous amount of walnut bits are necessary for the manufacturing and filling process of walnut ice cream. A certain quantity of waste is produced during the initial procedure until the concentration reaches the desired level. The mass of ice cream and the pieces of walnut must be separated from one another in order for them to be used once more.
